

INSTALLATION INSTRUCTIONS FOR NEW YORK COMBINATION EMERGENCY EXIT LIGHT

IMPORTANT SAFEGUARDS:

When using electrical equipment, basic safety precautions should always be followed including the following:

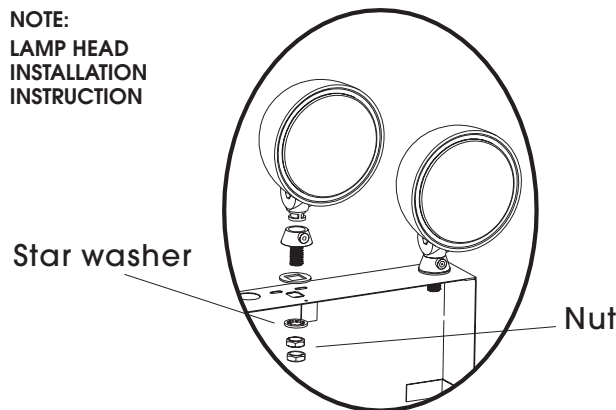

BACK MOUNTING

1. Slide out front exit panel face plate and lens/filter by removing the screw on the bottom of the unit.
2. Remove internal metal reflector by removing the (2) screws.
3. Determine which mounting holes will be used to mount fixture to J-Box, then punch out proper K/O's from the K/O pattern on the back panel of the housing.
4. There are two additional KEY HOLE SLOTS located at the top of the unit. These additional holes must be used when the unit is mounted to the wall.
5. Connect AC Supply wires to fixture input wires. BLACK is for 120 Volt. RED is for 277 Volt. WHITE is the COMMON.
6. Connect battery. RED to POSITIVE, BLUE to NEGATIVE.
7. Replace internal metal reflector and secure with the (2) screws.
8. Reinsert the front exit panel and red lens/filter and secure with screw.

OPTION: The package includes an ADDITIONAL 3rd MIDDLE LIGHTING HEAD. If this additional head is desired or required, it may be mounted to the top of the fixture in the same way the other 2 heads are mounted. This step can be done before, during or after installation.

1. Punch out the SQUARE mounting hole on the top of the unit.
2. Mount the head securely with the included nut.
3. Attach the RED & BLUE FEMALE CONNECTORS to the PC BOARD in the same position as the other lighting heads are connected.
