FOR IMMEDIATE RELEASE

JUNO LIGHTING GROUP™ INTRODUCES SMALLER FLOODLIGHT WITH BIG CAPABILITIES

AccuFlood™ EF is a good thing in a small package

DES PLAINES, Ill. (Dec. 13, 2007) —Juno Lighting Group™ is introducing the AccuFlood™ EF Series, a powerful, yet subtle, lighting solution for commercial, residential and some industrial uses. It's the latest addition to Juno's AccuLite™ line of products, and its uses include the illumination of building or home facades, signs, and small parking lots.

The AccuFlood EF Series is a smaller version of larger floodlights that have the same wattage capabilities. This compact floodlight, with its size of EPA 1.12 ft² (with 1.2 drag factor), can handle a full range of lamps – from 70W to 400W metal halide and high pressure sodium. It also has the capacity for a full range of ballasts, including HPF ballasts for low temperature starting.

"We were trying first of all, to make it as invisible as possible," said Dan Fernandez, director of product management for AccuLite and NaviLite®, Juno Lighting Group. "But we also wanted it to be as powerful and capable as possible for its size."

The compact size of the EF floodlight also has economic benefits: it allows the use of lighter poles or more fixtures per pole, for significant overall project cost savings.

Other notable elements of the AccuFlood EF Series include the one-piece lens and body features, which give it a sleek, soft-edged profile. The dark bronze polyester powder finish is aesthetically low-key, as well as rust-proof.

The fixture gaskets are made with silicone rubber to withstand high temperatures. Adding to its durability, the AccuFlood EF Series is certified UL, cUL for wet locations.

-more-

Floodlights in the AccuFlood EF Series are available with either slipfitter or yoke mounting components. They also have removable hinged doors, keyed to prevent accidental removal during relamping.

Optically, the product has been assembled with a wide-beam distribution pattern, for maximum lighting performance.

AccuLite™

AccuLite™ highbays, lowbays, commercial and industrial lighting are specified on commercial and industrial projects throughout North America and are sold through electrical distributors.

Juno Lighting Group®

Founded in 1976, Juno Lighting Inc. is a leader in offering high-quality and innovative commercial and residential lighting solutions. Under the Juno Lighting Group umbrella, the company comprises eight product brands: Juno®, Indy™, Alfa™, AccuLite™, Elate™, Aculux™, NaviLite® and DanaLite. The product brands provide lighting fixtures that are attractive, well-engineered and easy to install.
