Juno Lighting Group adds LED Technology to AccuLite Outdoor Lighting Applications

LED light sources will provide customers with energy efficient lighting solutions for retail, commercial and industrial applications

Des Plaines, Ill., May 12, 2010 — Juno Lighting Group®, a subsidiary of Schneider Electric, and a leader in offering high-quality and innovative commercial and residential lighting solutions, today announced that its commercial/industrial lighting brand, AccuLite™, is introducing a new generation of outdoor luminaires that integrate AccuLite's established solutions with new high-efficiency light-emitting diode (LED) light sources. Utilizing high quality LEDs that provide fifty thousand hours of light at 40°C ambient (L70*), AccuLite's new LED lighting offerings provide an eco-friendly, high-quality solution with lower operation and maintenance costs over the life of the product.

AccuLite's outdoor product line is designed with best-in-class LEDs and temperature controls that manage heat to ensure long life and sustained lumen output. The breadth of AccuLite's product line offers an LED solution for every outdoor application including floodlights for facades, landscapes and sign lighting, building mounted perimeter and security lighting, pathways and settings where vandal resistant lighting applications are required.

AccuLite's new outdoor LED lighting offering includes the following products:

- **Polaris™ LED:** Architecturally dramatic wall mounted fixtures that accentuate building facades while providing energy efficient, functional lighting for enhanced security.
- **Stonewall™ LED:** An attractive yet rugged design, this line of eco-friendly vandal resistant LED wall sconces are ideally suited for decorative lighting applications in malls, schools and commercial buildings.
- **Parklume PL7 LED:** Combining an energy efficient LED light source with cylindrical design, the Parklume PL7 provides outstanding pathway lighting with minimum disruption to the landscape and the environment.
- **AccuPak™ WP LED:** Redesigned to incorporate LED electronics, the AccuPak WP security light delivers 55 percent energy savings compared to similar High Intensity Discharge (HID) fixtures.

Press Release

- **Caribe LED:** This outdoor flood light incorporates four different beam distributions with precise beam control through state-of-the-art optics.
- **Outdoor LED Step Lights:** Consuming only six watts** of power, AccuLite's Outdoor LED Step Lights use less energy than comparable fluorescent versions, and are rated for outdoor or indoor wall mount applications.

Additionally, the new, environmentally friendly, low profile DK Series Flood is designed for work light applications such as loading docks, refrigeration or storage areas and other traffic-related environments. It saves energy with its low wattage LED light engine and incorporates an optional motion sensor to turn the fixture off when the area is not in use.

“With the addition of LED light sources, Juno Lighting Group has merged AccuLite’s existing high-performance luminaires with highly efficient technology,” said Dan Fernandez, product management director for AccuLite, Juno Lighting Group. “The addition of LED technology will provide our customers with lighting options that will reduce energy consumption, cost less to operate and maintain and provide a longer service life compared to traditional lighting sources.”

The AccuLite product line is currently available through Juno Lighting Group sales agents and distributors, and pricing is determined depending on the specific size/scope of each individual project.
