Juno Lighting Group Introduces Cylindra LED Track Fixtures

Cylindra track fixtures to incorporate the latest in LED technologies and offer unsurpassed performance and operating efficiencies

Des Plaines, Ill., May 12, 2010 — Juno Lighting Group®, a subsidiary of Schneider Electric, and a leader in offering high-quality and innovative commercial and residential lighting solutions, announced today the availability of two Cylindra LED track fixtures that offer dramatic energy savings and operational efficiencies when compared to similar halogen products. The 22-watt Cylindra T253LED fixture produces illumination approximating a 75-watt PAR30 halogen, while the 15-watt T251LED fixture approximates a 50-watt MR16 halogen. Both fixtures reduce energy consumption by approximately 70 percent which reduces operating costs, and their 50,000 hour rated service life virtually eliminates maintenance. The Cylindra LED track series is available in three uniform beam spreads including spot, narrow flood and flood, providing maximum versatility and performance.

Cylindra LED track fixtures are the ideal lighting solution for retail, commercial and residential applications. Offering exceptional color quality and consistency, they are perfectly suited for merchandise and display lighting. The use of LEDs practically eliminates harmful UV emissions which protects sensitive merchandise from fading, and the lack of projected heat not only reduces HVAC costs, but also leads to a more comfortable environment overall.

Key features of the Cylindra LED Series include:

- The robust die cast aluminum Cylindra housing offers an elegant, contemporary aesthetic. The compact LED driver is integrated into the fixture design, minimizing the fixture footprint and vertical displacement from the track
- Innovative media cartridge with quick-release bayonet mounting method simultaneously accepts up to two lighting control accessories on the T253LED or one lighting control accessory on the T251LED
- Super-efficient thermal management assures service life of 50,000 hours or more; IR-free operation eliminates projected beam heat
- Available in 3000K and 4100K color temperatures with 85 CRI typical

Press Release

- LED color mix and tight ANSI-standard binning assures consistent bright-white light from each fixture
- Offered in three uniform beam spreads: spot, narrow flood and flood
- Durable die cast aluminum construction available in white, black and silver finishes
- T251LED is dimmable using high quality forward phase and reverse phase dimmers
- “EcoLEDgy™” driven, reduces energy consumption by up to 70 percent

“Cylindra is one of Juno Lighting Group’s most popular fixture series and it has advanced the art and science of track lighting to a whole new level,” said Michael McCown, Director of Product Management – Track Lighting for Juno Lighting Group. “With the launch of our new LED fixtures, Cylindra has further demonstrated its leadership position in the commercial and retail illumination space.”

The Cylindra LED track fixtures are currently available through Juno Lighting Group distributors. For more information, visit www.junolightinggroup.com

About Schneider Electric

Schneider Electric, a global specialist in energy management, is a leader in offering high-quality, innovative commercial and residential lighting solutions and advanced system controls. Schneider Electric provides lighting fixtures offered in the product ranges of Juno®, Indy™, AccuLite™, Aculux®, NaviLite® and DanaLite. Schneider Electric lighting and control solutions including Powerlink™, C-Bus™ and Cassia™, provide one of the most comprehensive energy-saving offers in the industry, combining automated and web-enabled control with occupancy-based solutions and dimming capabilities.
