FOR IMMEDIATE RELEASE

NEW PARKING GARAGE LUMINAIRE BY JUNO LIGHTING GROUP™ DESIGNED WITH COMFORT IN MIND *Easy-to-install AccuLite™ GL provides increased comfort and security*

DES PLAINES, III. (December 13, 2007) — The AccuLite™ GL Series™, a new garage luminaire being produced by Juno Lighting Group, provides peace of mind for facility managers and garage patrons alike.

Facility managers can rest assured that the AccuLite GL Series is both easy-to-install and sturdy enough to stand up to various weather conditions or potential vandals.

One feature that makes the AccuLite GL Series parking garage luminaire so easy to install is its “twist and lock” design. Once wiring is done, installers simply have to hold the luminary against the mounting plate, and give it a good twist to lock it into place. For further ease of installation, GL Series luminaires can be ordered with the vertical HID Lamp installed.

While it goes into place easily, it is durable once installed. Made with heavy-duty die-cast aluminum, it is virtually vandal-resistant.

“This is the thickest construction you can find in this type of luminary,” said Dan Fernandez, director of product management for the AccuLite and NaviLite® brands of Juno Lighting Group. “In general terms, it’ll last longer than regular fixtures.”

The vertical lamp HID feature of the GL Series improves its light output and provides longer lamp life, resulting in lower maintenance, which can save owners time and money.

The thoughtful design of the AccuLite GL parking garage patrons includes the addition of an aluminum lens ring, which reduces the glare for drivers approaching the

-more-

light. Also, a four percent uplight helps illuminate the ceiling, offering more complete lighting for increased security.

Additionally, GL Series luminaries come with the option of being made into egress lighting with an emergency battery pack or emergency circuit.

The AccuLite GL can come with a metal halide lamp, for the most high-quality light. For those interested more in energy-efficiency, the AccuLite GL Series can come with a high-pressure sodium lamp. The compact fluorescent lamp option, which is also energy-efficient, allows for use of emergency batteries, providing egress lighting even when there's a power failure.

AccuLite™

AccuLite™ highbays, lowbays, commercial and industrial lighting are specified on commercial and industrial projects throughout North America and are sold through electrical distributors.

Juno Lighting Group®

Founded in 1976, Juno Lighting Inc. is a leader in offering high-quality and innovative commercial and residential lighting solutions. Under the Juno Lighting Group umbrella, the company comprises eight product brands: Juno®, Indy™, Alfa™, AccuLite™, Elate™, Aculux™, NaviLite® and DanaLite. The product brands provide lighting fixtures that are attractive, well-engineered and easy to install. For more information on Juno Lighting Group and its family of brands, visit www.junolightinggroup.com. Juno Lighting Group is a subsidiary of Square D Company and Schneider Electric, the world's power and control leader.
