### **FOR IMMEDIATE RELEASE**

## **JUNO ADDS NEW CONCENTRIC CYLINDER CERAMIC METAL HALIDE TRAC FIXTURES**

***Design innovations augment industry's most comprehensive family of CMH  
Trac Fixture designs***

**DES PLAINES, Ill. (May 15, 2008)** — Juno continues to expand its Ceramic Metal Halide Trac Lighting fixture offering with the addition of the new Concentric Cylinder - expanding the available options for energy-efficient merchandising and display lighting.

“The Concentric Cylinder offers outstanding glare control, premium optical performance and simplified maintenance in a compact, economical package,” said Michael McCown, director of product management for Juno Trac Lighting.

The Concentric Cylinder is ultra compact, and combines a simple aesthetic with superior performance. It has a computer contoured faceted reflector, securely mounted to the lamp shroud, for precise optical alignment with the lamp. The lamp shroud has a 1” deep integral step baffle for optimal shielding and brightness control. The detachable lamp shroud is easily removed for simplified fixture maintenance. Optimum beam control can be achieved via its clear lens, which can be replaced with a variety of media accessories.

The Concentric Cylinder is available in wattages ranging from 20W to 70W offering specifiers a very energy-efficient lighting solution. It is available in both the vertical ballast MH<sub>v</sub> Series and the horizontal ballast MH<sub>2</sub> Series. It is designed to accept miniature T4, G8.5 CMH lamps which enable it to offer a very small, close-to-the-trac profile. Ceramic Metal Halide (CMH) Trac Lighting from Juno offers the most comprehensive family of CMH fixture designs in the industry, continually optimizing energy-efficiency, optical performance and reliability. Juno's complete CMH trac fixture line is detailed in the new CMH Trac Lighting catalog from Juno available at [www.junolightinggroup.com](http://www.junolightinggroup.com).

## **Juno®**

**Juno**, the first Juno Lighting Group brand and product line, continues to offer distinctive, high-quality recessed and track lighting that is easy to install. Juno is regarded as the market leader in the track lighting category. Juno's products - which are used in retail stores, hotels and restaurants, residences and commercial buildings - include Trac-Master®, Trac 12® and Flex 12™ trac lighting systems, commercial downlights, residential downlights, and undercabinet lighting.

## **Juno Lighting Group**

Founded in 1976, Juno Lighting Inc. is a leader in offering high-quality and innovative commercial and residential lighting solutions. Under the Juno Lighting Group umbrella, the company comprises eight product brands: Juno®, Indy™, Alfa™, AccuLite™, Aculux™, NaviLite®, DanaLite and Elate®.
