FOR IMMEDIATE RELEASE

JUNO LAUNCHES NEW CERAMIC METAL HALIDE FLOOD/WALL WASH TRAC FIXTURES

Small size and more lamp choices highlight the new offering

DES PLAINES, Ill. (May 15, 2008) — Juno continues to expand its Ceramic Metal Halide (CMH) Trac Lighting options with the addition of new flood/wall wash fixtures - expanding what is already the most comprehensive family of CMH fixture designs in the industry.

“These new wall washers, which were developed based on customer feedback, offer our customers more lamp choices and smaller fixture footprints, with exceptional performance and clearly superior aesthetics,” said Michael McCown, director of product management for Juno Trac Lighting.

The first option is the MH_v Series vertical ballast Flood/Wall Wash fixture which delivers outstanding photometric performance in a compact fixture footprint. It is available for use with either T4 G8.5 or T6 G12 lamps in wattages ranging from 20W up to 150W. Small T4 and T6 lamps enable a reduced housing size and excellent beam control. Its patterned specular reflector delivers a smooth, consistent beam pattern with excellent color mixing. Lamps can be easily replaced from the front without the use of tools - to help facilitate lamp replacement, its die cast aluminum lensholder slides to expose the lamp compartment.

The second option is the MH₂ Series Flood/Wall Wash fixture which offers a more uniform wash in a horizontal mount ballast design. It also is available for use with either T4 G8.5 or T6 G12 lamps in wattages ranging from 20W up to 150W. It offers similar features to the MH_V Series Flood/Wall Wash fixture and is ideally suited for applications which use other MH₂ spotlights.

Ceramic Metal Halide (CMH) Trac Lighting from Juno offers the most comprehensive family of CMH fixture designs in the industry. The line incorporates advances in materials and technology, while continually optimizing energy-efficiency, optical performance and reliability. Juno's complete CMH trac fixture line is detailed in the new CMH Trac Lighting catalog from Juno available at www.junolightinggroup.com.

Juno®

Juno, the first Juno Lighting Group brand and product line, continues to offer distinctive, high-quality recessed and track lighting that is easy to install. Juno is regarded as the market leader in the track lighting category. Juno's products - which are used in retail stores, hotels and restaurants, residences and commercial buildings - include Trac-Master®, Trac 12® and Flex 12™ trac lighting systems, commercial downlights, residential downlights, and undercabinet lighting.

Juno Lighting Group

Founded in 1976, Juno Lighting Inc. is a leader in offering high-quality and innovative commercial and residential lighting solutions. Under the Juno Lighting Group umbrella, the company comprises eight product brands: Juno®, Indy™, Alfa™, AccuLite™, Aculux™, NaviLite®, DanaLite and Elate®. The product brands provide lighting fixtures that are attractive, well-engineered and easy to install.
